## Emily's Analysis

### Keeneland Race 10

**Post Time 4:48 PM CST**

Analysis by Emily Gullikson

#8 FREE COUNTRY can be upgraded from the debut as part of the early pace racing X_FLOW before losing ground and NO_PUSH while the race winner, Mitty's Griddy rallied to win from well off the pace. #5 THUNDERHAWK raced X_BIAS on debut and RANK slightly X_FLOW last month when stretched out around two turns. That could present some upside as they find the class drop as well as the return to a sprint here.

As noted earlier in the week, trainer G. Compton can send out live FTS in this category and given a look with debuting #10 FRACK BABY with C. Torres aboard - the two teamed up earlier in the meet to finish third with a TROUBLE trip on a juvenile MSW runner called Surfin' M.

#12 WINTER CREEK will be tested with the circuit switch though noted from the debut raced X_FLOW and upgraded however might not present the value in this race required based on the ML that should hold given the connections and could allow for overlays on others.

### Santa Anita Race 9

**Post Time 7:00 PM CST**

Analysis by Emily Gullikson

#4 KANTHARA was given a follow off her debut back in 2022 and projected to IMPROVE did just that breaking her maiden in the second career start. She will follow a similar "second off" pattern with the long 693-day layoff return in August at DMR where much like her debut showed run and making a MOVE X_FLOW can IMPROVE off the effort and outcome.
